Dear colleagues,

The Department of Management Science and Engineering at Stanford University is searching for tenure-track faculty at the junior level, either Assistant or untenured Associate Professor, and I am writing to encourage strong candidates on this year's market to apply. I am co-chairing the search along with Ben Van Roy.

From the ad: "We invite applications from individuals working at the frontiers of Management Science and Engineering. MS&E is a multidisciplinary department with research efforts spanning a broad intellectual spectrum, from analytics and computation to the social and behavioral sciences, united by an interest in engineering solutions to pressing societal problems."

Let me add one personal note, since the ad is deliberately broad and the areas we end up hiring in will depend on the pool. I would especially encourage scholars whose work sits at the intersection of AI and innovation or entrepreneurship to put their files in, since in my view that is where a great many of the important questions in our field are now being asked, and it is an area where I would very much like to see a strong applicant pool from the BPS, TIM, ENT and OMT communities. Stanford MS&E offers a strong base for that work, with the Stanford Technology Ventures Program, colleagues across the School of Engineering and the social sciences, and PhD students who move easily between computational methods and management theory.

Applications should include a CV, brief statements of research and teaching interests (3 to 5 pages total for both combined), and the names and email addresses of 3 to 5 references. Letters are requested automatically through the online portal as soon as you submit.

On timing, the review is rolling. **It begins on September 15, 2026, applications received by November 1, 2026 are reviewed in full, and there is no hard deadline**, so later applications will still be considered. Interviews begin during the fall term and strong early files can be moved forward quickly, so I would very much encourage people to apply early.

Department posting: <https://msande.stanford.edu/get-involved/stanford-careers/faculty-openings>

Apply here: <https://facultypositions.stanford.edu/jobs/assistant-professor-or-associate-professor-without-tenure-management-science-and-engineering-stanford-university-california-united-states>

Please do forward this to anyone on the market who would be a good fit.

Best,
Chuck Eesley
